Education

Durham University

Sep. 2024 – May 2028

Master of Science in Mathematics and Computer Science

Durham, UK

Relevant modules of study and grades can be found [here](#).

Newcastle Sixth Form College

Sep. 2022 – June 2024

A levels of Further Mathematics (A), Mathematics (A*), Computer Science (A), Physics(A)*

Newcastle upon Tyne, UK

Experience and Leadership

NEDES

Sep. 2024 – Present

Maths Tutor

Newcastle, UK

- Tutor primary and secondary school students in a classroom setting, clarifying mathematical topics from the core curriculum.
- Develop and deliver lesson plans tailored to student needs, improving conceptual understanding and academic performance.
- Manage a classroom environment, fostering student engagement and analytical problem-solving skills.
- Explored ways to help students with school work through online meetings.

Dialogue Society

Dec. 2022 – Present

Volunteer and Youth Platform Leader

North East, England

- Collaborate with a team to organise and facilitate events aimed at fostering inter-community dialogue.
- Acted as Master of Ceremonies (MC) for 4 events, engaging diverse audiences of up to 200 and facilitating program schedules, demonstrating strong public speaking and audience management skills.
- Demonstrated leadership by organising interfaith and community unity events, managing logistics, coordinating volunteer teams and recruiting young volunteers.

Mentor Wise UK

Sep. 2023 – Present

Mentor

North East, England

- Fostered a supportive and confidential environment by organising weekly meetings, enabling 7 mentees to build self-confidence and effectively address personal or academic challenges.
- Develop and maintain a trusting, confidential relationship with 7 mentees to help them build confidence and navigate challenges.
- Assisted mentees in developing crucial life skills, including goal-setting, time management, and effective study techniques.

Projects

Portfolio Optimizer | *Python, Pandas, NumPy*

January 2025

- Developed a quantitative tool in Python to construct optimal investment portfolios using Markowitz's Modern Portfolio Theory.
- Implemented mean-variance optimisation to compute the efficient frontier for a custom basket of assets, identifying the optimal risk-return trade-offs.
- Utilised NumPy and Pandas for data manipulation and mathematical calculations, and Matplotlib for visualising the efficient frontier and capital allocation line.
- Deployed a sample version on Streamlit and uploaded full project to Github, both can be found on my website [here](#).

High-Frequency Trading Simulator | *Python, NumPy, Pandas*

April 2025

- Built a simulation environment in Python to model and back-test high-frequency trading strategies on historical limit order book data.
- Engineered market-making strategy, evaluating its profitability and performance metrics like Sharpe ratio and max draw-down.
- Deployed a sample version on Streamlit and uploaded full project to Github, both can be found on my website [here](#).

More recent projects and more detail can be found on my [portfolio](#) or [Github](#).

May 2025

Technical Skills

Languages: Python, R, HTML/CSS, JavaScript, SQL

Libraries and Frameworks: Pandas, NumPy, Matplotlib

Technologies and Tools: Linux, GitHub, LaTeX, Excel

Spoken Languages: English(Fluent), Turkish(Fluent)
